

# SWAN TECHNOLOGIES

---

**COMPANY PROFILE**

## Briefing

---

SWAN TECHNOLOGIES HAS BEEN:

Founded in 1990 as a Trading and Engineering Consultants Company for industrial computer products and control systems.  
Registered under license number 33335 First Class memberships of Homs-Chamber of Commerce & Industry.  
Updated in 1993 as a company dealing with Control System Integrated and Industrial Equipment.  
Played a role in the development industrial structure for local important clients in Syria.

## Fields

---

Depending on Swan Technologies relationships with several manufacturing and distributing overseas companies and on its wealth expertise to such different engineering areas as:

- \* Oil/Gas Fields
- \* Sugar Industries
- \* Petroleum Refineries
- \* Power Generator Stations
- \* Chemicals and Fertilizer Plants
- \* Environmental Monitoring Units

Oil Refinery

## Analyze

---

In spite of the current challenges, Swan Technologies across years of studies, works and as a result of such efforts in several fields of industry, can give you now the best quality of:

- \* Configuration and Trimming
- \* Materials Importing and Supplying
- \* Installation Supervision, Erection Services
- \* Commissioning, Startup and Operation Process
- \* Maintenance and Engineering Services
- \* Technical Assistance and Training

Begins from the first touches until full-package delivery on Turnkey projects.

**Sugar and Alcohol**

## Check!

---

Referring to the development of technical equipment Swan Technologies has established a search team to trace the growing in computer's software and hardware.

It works with combination of specific knowledge, professional project management and know-how in instrumentation & control solutions, which is the guarantee for efficient and cost saving engineering.

## Scope of Supply..

---

- ◆ Consultant
- ◆ Basic Design & Detail Engineering
- ◆ Procurement
- ◆ Technical & Commercial Projects
- ◆ Installing & Supplying full package integrated solutions

## Together ...

---

One of modern man's greatest tasks is environmental and pollution control, and Swan Technologies is proud to take a role in a wide range of programs and systems to protect the Environment, prevent pollution and supply technical solution for:

- ◆ Process Water Treatment
- ◆ Drinking Water Treatment
- ◆ Recycling of Process Water
- ◆ Industrial Waste Water Treatment
- ◆ Municipal Waste Water Treatment

In order to meet the customers' requirements via its expert-relationships in plant engineering with a wide view to offer all services, which are necessary for smooth engineering

Power Generation

Water and Wastewater

## The way we are known.

---

- With sufficient experience, high ambition, flexibility and high quality equipment, Swan Technologies increases your competitive advantages.
- ■ Due to the fact that careful attention must be paid to guarantee safe production and enhanced technology Swan Technologies count on the success of world wide companies by representing and promoting such important equipment.
- ■ ■ Swan Technologies is improving customers' field of activities by going on keeping a good relationships with foreign companies to closely cooperate for the project and business in accordance with the client requirements and the specific conditions of the proposed orders.

## The fields we know..

---

Swan Technologies is your partner for supplying its end-users with:

- ◆ Process Control System
- ◆ Control Valves
- ◆ Density Solution
- ◆ Temperature Solution
- ◆ Pressure & Flow Solution
- ◆ Level Measuring Technology
- ◆ Control Valve, Positioner & Actuators
- ◆ Field/Panel mounted Indicators and Recorders

Chemical and Petrochemical

# References

Some of Swan Technologies clients are:

- ◆ Universities and Training Centers
- ◆ Homs Sugar Company
- ◆ Homs Refinery Company (HRC)
- ◆ Baniyas Refinery Company (BRC)
- ◆ Syrian Petroleum Company (SPC)
- ◆ Syrian Gas Company (SGC)
- ◆ Al-Furat Petroleum Company (AFPC)
- ◆ General Fertilizers Company (GFC)
- ◆ Syrian Company for Oil Transportation (SCOT)
- ◆ Mehardeh Public Generation Company
- ◆ General Company for Hydraulic Studies (GCHS)
- ◆ General Organization for Sugar Industry
- ◆ General Company for Phosphate and Mines (GECOFAM)
- ◆ General Irrigation Directorate for Dejeleh & Al Khabour Basin

Syrian Arab Republic

# About Us

---

**Swan Technologies** is a supplier of instrumentation and complete integrated system solutions of hardware and software along 15 years in the market and of experience in systems engineering and design, based on the leading technologies and depending on international suppliers' expertise.

**Swan Technologies** provides a range of engineering services, training, supplying, installing and operating a line of process control instruments for most industries areas, which is incorporated HART protocol and PID control using Fieldbus/Profibus Solution for Process Control Technology in full integrated package.

**In** order to a better attend to the market, **Swan Technologies** policy is to keep in very close contact to local customers and has a tradition of helping them introduce and benefit from new technologies, and integrate it with their existing assets.

**Swan Technologies** is a product agency corporation in Flow/Level Technology, offering products locally, from world-leading suppliers through business area **Control System and Component**.

**Being** close to and satisfying the **customer** is one of our highest priorities..

**Eng. Deeb Shaer**

## Applications & Products:

**Swan Technologies** can offer specialized products and solutions involving measurement and control technology. Our product range is completed by comprehensive instrumentation package for control technology.

Today, our core competence is focused on industrial control technology and, further more, we have been active in the systems business since many years, and have provided individual solutions for our customers in practically most industrial branch.

**Swan Technologies** is at your service everywhere with its own sales engineers and sales partners and suppliers from different countries in the world.

**Swan Technologies** Market Sectors:

**Oil and Gas**  
**Sugar Industry**  
**Power Stations**  
**Water and Wastewater**  
**Chemicals and Petrochemicals**
